

View details of a hike test

This document will specify the steps to do to see detailed information on a hike and the expected results.

Prerequisites

1. Create an account for HikeTracker with either a **local guide** or **hiker** role.
2. Open a terminal and perform the following commands:

```
cd ./client
npm install
npm start
```

Execution steps

1. Open the main page at link <https://localhost:3000>.
